

# The correct pruning of raspberries

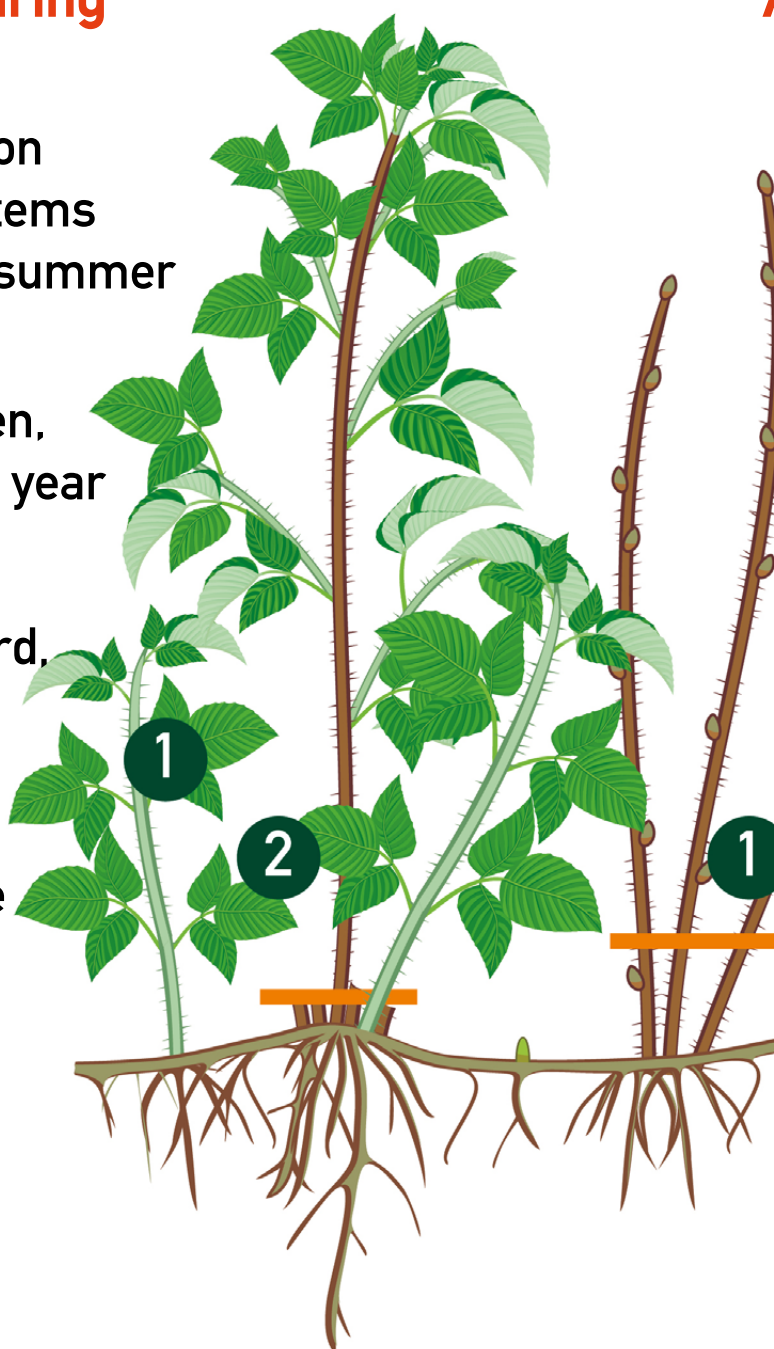

For a rich harvest and a long-life span

## Summer-bearing raspberries

Bearing fruits on two-year old stems  
Prune back in summer after harvest

- 1 Keep green, fresh first year shoots
- 2 Cut off hard, woody stems from last year close to the ground

## Autumn-fruiting raspberries

Bearing fruits on present year's stems  
Prune back in autumn after harvesting the fruits

- 1 Prune back approx. the size of the hand span above ground
